

*Do you know the proper way.....*

*.....to make divots on the practice grounds*

Whether you are grinding away with your mid-irons on the range or refining your finesse pitching at the Sid you want to minimize your divot footprint by following the straight line practice protocol on the left. For each subsequent shot place your ball one inch behind your previous divot. It will eliminate divot scatter and make a huge difference to the long term maintenance of the practice grounds.

*THE KEEPERS*
